Cover Letter

I am Si Thu Myo. I live in Yangon. I am computer science student from Dagon University. I learned web development over 3 years and I have a lot of knowledge and can do most projects.

I want to work together with your company because I have many reasons. Because your company constitute different kinds of nationality and skillful employees. So I want to learn and want to get valuable experiences from senior web developers.

I believed that I must get various kinds of web development knowledge. Because of I have working experiences in Web Development fields. I want to work together with more employees and we can share our experiences.

If u give me a chance, I want to serve at your company and I want a member of your company. And then I will use best of the best my working experiences for your valuable customers.
